

# 6<sup>th</sup> Probability Summer School

July 19 – 30, 2010 at Cornell

Three main lecturers will each give six 75-minute lectures

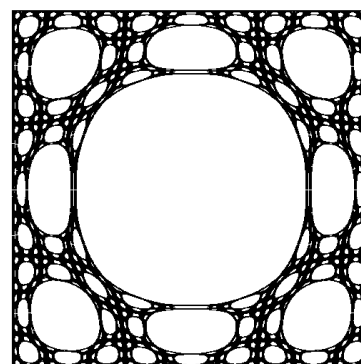

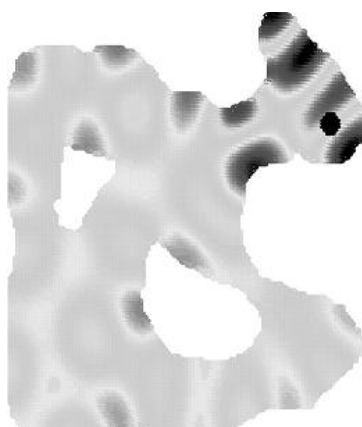

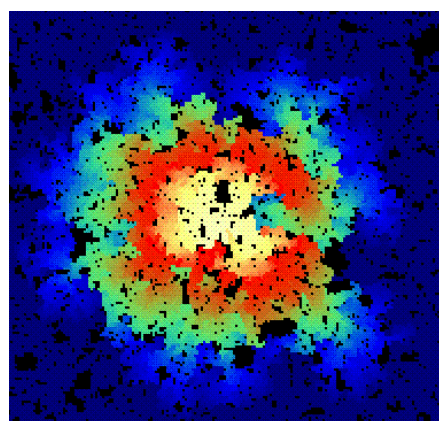

**Martin Barlow**      *Heat kernels on percolation clusters*

**Bruce Driver**      *Heat kernel weighted  $L^2$  spaces*

**A. Grigoryan**      *Heat kernels on metric measure spaces*

In addition there will be two lecture series by

**A. Bendikov, Z.Q. Chen, M. Gordina, T. Kumagai**

*Individuals who wish to participate should submit the registration form on the conference web page by April 1. . Funding from an NSF grant is available to provide lodging in a Cornell dorm for all participants and pay \$400 toward the local expenses of participants who are US citizens. This meeting is cosponsored by the Institute of Mathematical Statistics. For more information:*
